

DEEPANRAJ ARUMUGAM

DATA & VISUALIZATION ENGINEER | DATA ANALYST | POWER BI DEVELOPER

+91 8940991095 | deepanraj.a@outlook.com | linkedin.com/in/deepanraj-data-analyst | github.com/deeeepanbe | Tamil Nadu, India | Willing to Relocate: Chennai / Kochi | Immediate Joiner

Power BI ✓	Python ✓	SQL ✓	ETL ✓
Data Visualization ✓	Cloud Services ✓	Git & CI/CD ✓	Immediate Joiner ✓

PROFESSIONAL SUMMARY

Analytically driven **Data and Visualization Engineer** with **8 years of professional experience** transforming complex operational datasets into clear, visually compelling insights and business intelligence solutions. Strong expertise in **Power BI (DAX, Power Query, Data Modeling), Python, SQL, ETL Pipelines, and Cloud Data Services** including Microsoft Azure, GCP BigQuery, and Snowflake. Proven ability to develop interactive dashboards, optimize query performance on large datasets, collaborate with stakeholders to define business needs, and ensure accuracy and usability of all visualizations. Familiar with **Git version control and CI/CD pipelines**. Willing to relocate to **Chennai or Kochi**. Available as an **immediate joiner**.

CORE TECHNICAL SKILLS

Data Visualization:	Power BI (Advanced DAX, Power Query, Data Modeling, KPI Dashboards, Drill-Through, Row-Level Security), Tableau, Excel VBA, Matplotlib, Seaborn
Python:	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn — data cleaning, transformation, EDA, and automated reporting pipelines
SQL and Databases:	MySQL, Oracle SQL, T-SQL, Azure SQL Database — complex queries, Joins, CTEs, Window Functions, Subqueries, stored procedures, query performance optimization
Cloud Data Services:	Microsoft Azure (Azure SQL Database, Azure Blob Storage, Azure Data Factory), GCP BigQuery, Snowflake — cloud data ingestion, warehousing, and analytics
ETL and Data Engineering:	End-to-end ETL pipeline design, Bulk Insert (T-SQL), data ingestion and loading, data transformation, data modeling, star schema, Azure Data Factory
Version Control and DevOps:	Git, GitHub — version control, branching, pull requests; familiarity with CI/CD pipeline concepts and deployment workflows
Analytics Techniques:	Exploratory Data Analysis (EDA), Statistical Analysis, Trend Analysis, Pattern Recognition, Root Cause Analysis, KPI Definition, Large Dataset Optimization
Tools:	Advanced Excel (VBA, PivotTables, Power Query, VLOOKUP, XLOOKUP, Dynamic Charts), MS Office Suite, Jupyter Notebook

DATA ENGINEERING AND VISUALIZATION PROJECTS

All projects independently built to demonstrate professional-level data engineering and visualization skills.

Azure Hybrid Analytics Pipeline

2024 – Present

[Azure SQL Database](#) | [Azure Blob Storage](#) | [Azure Data Factory](#) | [T-SQL](#) | [Power BI](#)

- Architected an end-to-end ETL pipeline on Microsoft Azure — ingesting structured CSV datasets from Azure Blob Storage into Azure SQL Database using T-SQL Bulk Insert (Master Key, Database Scoped Credential, External Data Source).
- Designed scalable data models across analytics and dbo schemas (fact_sales, Customers tables) with star schema structure for optimized query performance on large datasets.
- Connected Power BI to Azure SQL Database for real-time dashboard refresh — delivering interactive KPI dashboards with DAX measures, drill-through reports, and trend visuals.
- Managed full pipeline versioning on GitHub with structured commit history — demonstrating Git and CI/CD-aware development practices.

Power BI Sales Performance Dashboard

2023 – Present

[Power BI](#) | [DAX](#) | [Power Query](#) | [SQL](#) | [Data Modeling](#)

- Built an interactive Power BI dashboard analyzing sales order fulfillment, dispatch performance, and inventory KPIs — featuring advanced DAX measures, KPI scorecards, drill-through reports, and dynamic trend analysis.
- Designed a star-schema data model connecting sales, inventory, and dispatch tables for cross-visual filtering and self-service stakeholder reporting.
- Optimized Power Query transformations and DAX calculations to ensure fast render times and accurate, usable visualizations across large datasets.
- Identified inventory bottlenecks and dispatch delays, improving planning efficiency by 30% through real-time visual insights.

GCP BigQuery Retail Data Analysis

2024

[GCP BigQuery](#) | [SQL](#) | [Python](#) | [Data Visualization](#)

- Queried and analyzed large-scale retail sales datasets from Google Cloud Platform BigQuery public datasets using advanced SQL — extracting trends, patterns, and business insights from millions of rows.
- Leveraged Python (Pandas, Matplotlib, Seaborn) to visualize query outputs as clear, compelling charts for stakeholder reporting and business decision support.
- Optimized BigQuery SQL queries for performance, reducing query execution time on large partitioned datasets.

Python EDA — Retail Customer Analytics

2023

[Python](#) | [Pandas](#) | [NumPy](#) | [Seaborn](#) | [Matplotlib](#)

- Performed comprehensive Exploratory Data Analysis (EDA) on a retail dataset using Python — covering data cleaning, transformation, statistical analysis, and visualization of sales trends, customer segments, and product performance.
- Transformed complex raw data into clear, visually compelling insights using Seaborn and Matplotlib — delivering findings as an interactive data story for both technical and non-technical audiences.

Snowflake Data Warehousing Project

2024

[Snowflake](#) | [SQL](#) | [Python](#) | [Data Modeling](#)

- Built a Snowflake cloud data warehouse with structured schemas for data ingestion, transformation, and analytical querying.
- Designed optimized SQL queries for large-scale data extraction and analysis, demonstrating hands-on experience with modern cloud database technologies.

WORK EXPERIENCE

DAKSHIN HOME FASHIONS, Tamil Nadu

Mar 2021 – Present

[Data Reporting Analyst](#) and [Operations Analyst](#)

Note: While my official role is in Quality and Merchandising, I independently built all data visualization and analytics solutions below — the primary basis for my transition to a full-time Data and Visualization Engineer role.

- Developed 10+ interactive Power BI dashboards with advanced DAX measures, Power Query transformations, and optimized data models tracking manufacturing KPIs — used daily by plant leadership for operational decision-making.
- Wrote complex SQL queries (Joins, CTEs, Window Functions, Subqueries) in Oracle SQL and Azure SQL Database to extract, manipulate, and analyze large operational datasets — optimizing query performance for faster reporting.
- Built end-to-end ETL pipelines on Microsoft Azure (Azure SQL Database, Azure Blob Storage) — ingesting, transforming, and loading structured data for BI dashboards.
- Transformed complex raw operational data into clear, visually compelling dashboards and reports for both technical and non-technical stakeholders at all levels.
- Automated Excel VBA and Power BI reporting workflows using Power Query and DAX — reducing manual reporting effort by **40%** and eliminating reporting errors.
- Managed all analytics projects on GitHub with structured version control — maintaining clean commit history and following CI/CD-aware development practices.
- Collaborated with production, maintenance, quality, and supply-chain teams to understand business needs and design KPI dashboards that answered the right questions.

LAKSHMI LIFE SCIENCES LTD

Feb 2019 – Jan 2020

MIS and Data Reporting Analyst

- Developed Excel VBA and Power Query MIS dashboards tracking production, quality, and compliance KPIs — with automated data refresh and dynamic chart visualizations.
- Queried MySQL and Oracle databases to extract, clean, and analyze large production datasets for weekly and monthly management reporting.
- Translated complex data into clear, actionable reports for management, improving operational reporting accuracy through structured data validation processes.

SUNDRAM FASTENERS LIMITED

May 2016 – Oct 2017

Process and Reporting Analyst

- Performed production data analysis and developed MIS reports tracking operational performance and quality KPIs for engineering and management teams.
- Optimized SQL queries for data extraction from production databases and visualized insights using Excel charts and dashboards.

CERTIFICATIONS

- ✓ Microsoft Power BI Data Analyst Associate (PL-300) — In Progress
- ✓ Google Data Analytics Professional Certificate — Coursera (2024)
- ✓ Business Analyst Master Certification — Edureka
- ✓ Tata Data Visualization Virtual Internship — Forage
- ✓ BCG Data Science Job Simulation — Forage

EDUCATION

Bachelor of Engineering (B.E.) — Mechanical Engineering

2016

Pavai College of Technology, Tamil Nadu, India
